

Andrew Garcia Mosquera

Software Engineer | Founder of Lyroo

Armenia, Quindio, Colombia | contact@andrewgarcia.dev | +57 320 657 4470 | andrewgarcia.dev | linkedin.com/in/andrewgarciam | github.com/DrewGGM

SUMMARY

Software engineer and founder of Lyroo S.A.S, a Colombian startup building LyrooPOS - an offline-first point of sale with an embedded DIAN electronic invoicing engine. Specialized in backend development and application architecture (Java/Spring Boot, Go, hexagonal architecture). Currently building core banking systems at COFINCAFE and full-stack client software at JAMS Technologies, while leading product and engineering at Lyroo. Strong foundation in QA, clean code and agile methodologies.

EXPERIENCE

Junior Software Developer

Financiera Cofincafé (Cooperativa de Ahorro y Crédito) | Armenia, Quindio, Colombia

| Aug 2026 - Present (incoming)

Hired into a permanent engineering role after the internship, continuing on the cooperative's core banking platform.

- Developing and maintaining features on the Apache Fineract core banking system
- Supporting financial products and banking module configuration in production

Development Intern

Financiera Cofincafé (Cooperativa de Ahorro y Crédito) | Armenia, Quindio, Colombia

| Jan 2026 - Jul 2026

Assisted in the development and support of the core banking system using Apache Fineract and Mifos.

- Helped implement financial products and configure banking modules
- Resolved issues and contributed to system improvements
- Worked with the Apache Fineract and Mifos open-source banking platform

Full Stack Developer

JAMS Technologies | Colombia | Remote

| Apr 2026 - Present

Building custom web and mobile software for clients at a Colombian development studio, from MVPs through to scalable enterprise platforms.

- Developing full-stack features across the front end, API and database
- Delivering client projects to production against agreed scope and deadlines

Founder & Lead Software Engineer

Lyroo S.A.S | Armenia, Quindio, Colombia | Remote-first

| May 2025 - Present

Founded Lyroo, a software startup for Colombian SMBs: LyrooPOS - a desktop point of sale with an embedded DIAN electronic invoicing engine (offline-first, unlimited invoicing with no per-document fees) - and Lyroo Build, a boutique custom software studio.

- Built LyrooPOS end-to-end: Go (Wails) backend with 31+ services + React 18 frontend over PostgreSQL - v1.2 in production, first active customers since July 2026
- Engineered an embedded DIAN e-invoicing core (UBL 2.1) - unlimited electronic invoicing without third-party APIs or per-folio costs
- Designed offline-first architecture: local data with AES-256 encrypted cloud backups, real-time kitchen/waiter apps via WebSocket, Bold payment terminals
- Lead product, engineering, sales and customer onboarding, including DIAN digital-certificate management for clients

PROJECTS

LyrooPOS - Restaurant Point of Sale

pos-system.v1.andrewgarcia.dev | [gh:DrewGGM/demo-pos-system](https://github.com/DrewGGM/demo-pos-system)

Lyroo's flagship product: a desktop point of sale for Colombian restaurants, shipping in production at v1.2. **Stack:** Go, Wails, React, TypeScript, PostgreSQL, WebSocket.

AI Content Bot

ai-content-bot-demo.andrewgarcia.dev | [gh:DrewGGM/ai-content-bot](https://github.com/DrewGGM/ai-content-bot)

Generates reels, carousels, posts and code-rendered motion videos for any brand using ANY coding agent (Claude Code, Codex, Gemini CLI, Kimi, Cursor...) or LLM API (OpenAI-compatible, OpenRouter, Ollama). **Stack:** Node.js, TypeScript, AI Agents, Remotion, FFmpeg, Cloudflare D1/R2.

VetApp - Veterinary clinic management

[gh:DrewGGM/Proyecto-AppsEmpresariales-VetApi](https://github.com/DrewGGM/Proyecto-AppsEmpresariales-VetApi)

Full-stack management system for veterinary clinics: owners and pets, appointments and medical consultations, vaccinations, treatments, and reminders. **Stack:** Java 17, Spring Boot 3.4, DDD, MySQL, Angular 19, Tailwind.

SKILLS

Languages: Java, Go, TypeScript, Python, SQL

Frameworks & Libraries: Spring Boot, React, Node.js, Next.js, Angular, Wails, Selenium

DevOps & Tools: Git, Docker, Cloudflare (Pages/D1/R2), Scrum

Software Engineering: OOP, Design Patterns, Data Structures, Clean Code, Hexagonal Architecture, Microservices

Areas of Expertise: Backend & Frontend Development, Software Architecture, QA, Usability

Spoken Languages: Spanish (Native) | English (Professional)

EDUCATION

Bachelor's Degree, Software Engineering | Institucion Universitaria EAM

| Feb 2023 - Present

Bootcamp, QA Engineer | TripleTen LatAm

| Dec 2024 - Jun 2025

CERTIFICATIONS

Spring Boot: Backend Enterprise Professional Certificate (Dev Senior Code, 2025) | QA Engineer Bootcamp (TripleTen LatAm, 2025) | Scrum Fundamentals Certified (SFC) (VMEdU inc, 2024) | Desarrollo Web y UX/UI (Next U, 2022) | DevOps, APIs and Microservices Architecture Fundamentals (Udemy, 2025) | Angular (Edutin Academy, 2025) | Spring Framework (Udemy, 2025)
